Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The following documents have been cited in the International Search Report:

D1: WO 98/35957 A (BAYER AG (D)) 20 August 1998 (1998-08-20)

D2: US-B-6 399 6311 (PFIZER INC (US)) 4 June 2002 (2002-06-04)

D3: WO 01/09120 A (ORTHO MCNEIL PHARM INC (US)) 8 February 2001 (2001-02-08)

D4: WO 01/07409 A (ASTRAZENECA UK LTD (UK)) 1 February 2001 (2001-02-01)

Novelty (Article 33(2) PCT)

The present compounds differ from the structurally closest related prior art compounds in D1 and D3 in that B and R5 do not form a ring together and from the closest examples in D2 and D4 in the phenylamino group.

The present claim set is therefore novel.

Inventive Step (Article 33(3) PCT)

D1-D4 disclose NPY5 ligands for the treatment of obesity. D1 can be regarded as the closest prior art.

The problem of the invention was the provision of new NPY5 ligands for the treatment of obesity.

None of the cited documents alone or in combination suggests the present substituent B.

The present claim set is therefore based on an inventive step.

Re Item VI

Certain documents cited

Reference is made to the following P-documents:

D5: WO 03/084939 A (LABORATORIOS DEL DR. ESTEVE (ES)) 16 October 2003
(2003-10-16), P-document

The P-document D5 does not disclose any compounds within the present scope nor does it suggest the present substituent B, which is the special technical feature of the invention. Even if it was later found that the claimed priority is not valid, D5 would therefore not change the present assesment of novelty and inventive step.
